## H

Head and neck cancer, surveillance in, brush biopsy-capsule technique for, 10

Hepatocellular carcinoma, fine-needle aspirates from, CD34 staining of, 273

Human papillomavirus, hybrid capture test for, 1

HUMARA assay, 1

Hyaluronic acid, in recurrent urothelial cancer, 75

Hyaluronidase, in recurrent urothelial cancer, 75

Hybrid capture test, 1

Hysteroscopy, in endometrial cancer, positive peritoneal washings and, 143

## I

Immunostaining. *See also* Staining  
cytokeratin 19, of thyroid aspirate, 307

Internet, literature search on, by patients, 71 (editorial)

Intranuclear holes, in parathyroid neoplasms, 41

Inverted filter sedimentation, cell block preparation by, differential diagnosis of atypical glandular cells of undetermined significance and, 265

## J

Journals, patients' use of, 71 (editorial)

## K

Ki-67

in breast aspirate vs. surgical specimens, immunocytochemical assays for, 61

in mesothelioma vs. reactive mesothelial cells vs. adenocarcinoma, 55

K-ras mutations

detection of, 1

in recurrent lung cancer, 258

## L

Liposarcoma, myxoid, fine-needle aspiration biopsy of, 167

Liquid-based cytology, cervical. *See* ThinPrep cytology

Literature search, by patients, 71 (editorial)

Liver, fine-needle aspirates from, CD34 staining of, 273

Loss of heterozygosity, detection of, 1

Lung cancer

recurrent, p53 and K-ras mutations in, 258

small cell, fine-needle aspiration biopsy of, 279

Lung cytologic specimens, morphology and telomerase activity in, 117

Lymph node biopsy, in melanoma, 162

Lymphoma

fine-needle aspiration biopsy of, with REAL classification, 320 (letter)

large cell, numeric chromosomal abnormalities in, FISH detection of, 126

## M

Malignant melanoma. *See* Melanoma

Malignant mesothelioma. *See* Mesothelioma

Medical literature, patients' use of, 71 (editorial)

Melanoma

fine-needle aspirate from, tyrosinase immunoreactivity in, 253

lymph node biopsy in, 162

metastases from, ultrasound-guided fine-needle aspiration biopsy of, 186

Mesenchymal lesions, fine-needle aspiration biopsy of, 178

Mesothelial cells, reactive

vs. adenocarcinoma, 55

E-cadherin and CD44 and, 194

vs. mesothelioma, 55

in pelvic washings

calretinin in, 313

E-cadherin and CD44 in, 299

Mesothelioma

vs. adenocarcinoma, 55

calretinin staining for, 194, 312

vs. reactive mesothelial cells, 55

Metastases

in melanoma, ultrasound-guided fine-needle aspiration biopsy of, 186

to salivary gland, fine-needle aspiration cytology of, 350

Microarray technology, 1

Microsatellite instability assays, for recurrent urothelial cancer, 75

Molecular biology, current applications and future directions of, 1

Mucinous tumors, appendiceal, pseudomyxoma peritonei cytology and, 17

Mutation detection assays, 1

Myxoid sarcoma, fine-needle aspiration biopsy of, 167

## N

Neuroendocrine cancer, cytology of, 148

Nuclear Matrix Protein NMP 22 test, 75

## O

Ovarian mucinous tumors, pseudomyxoma peritonei cytology and, 17

## P

p53

in breast aspirate vs. surgical specimens, immunocytochemical assays for, 61

in mesothelioma vs. reactive mesothelial cells vs. adenocarcinoma, 55

in recurrent lung cancer, 258

Papanicolaou smear

atypical glandular cells of undetermined significance in, 87, 201, 207

cell block preparation of by inverted filter sedimentation, 265
